

Name: Ian Mapacpac

Date: May 23, 2022

Section: BSIT – 2A

Directions:

1. As an application of the discussion of the Law and Order in UI Design and the YouTube Tutorial on creating a Responsive Website, create your own responsive website. Use the following constraints to create your web pages.
 - 1st Web Page:
 - ✓ Should be names as index.html.
 - ✓ Should provide overview of a particular website you want to create.
 - ✓ Should be responsive in all types of devices.
 - Should have at least 3 webpages. Contents may depend on your own perspective.
2. All HTML documents should have only one external css.
3. Place your website files (like images), html documents and css in a folder with a name format "YourLastnameFirstnameSection_ResponsiveDesign".
4. Host your website via GitHub Pages.
5. Compress your folder and attach it as the submission.
6. Comment the link of your website on the Google Classroom submission so that it can be browsed online.
